Homepage vs Design: Deviation Report

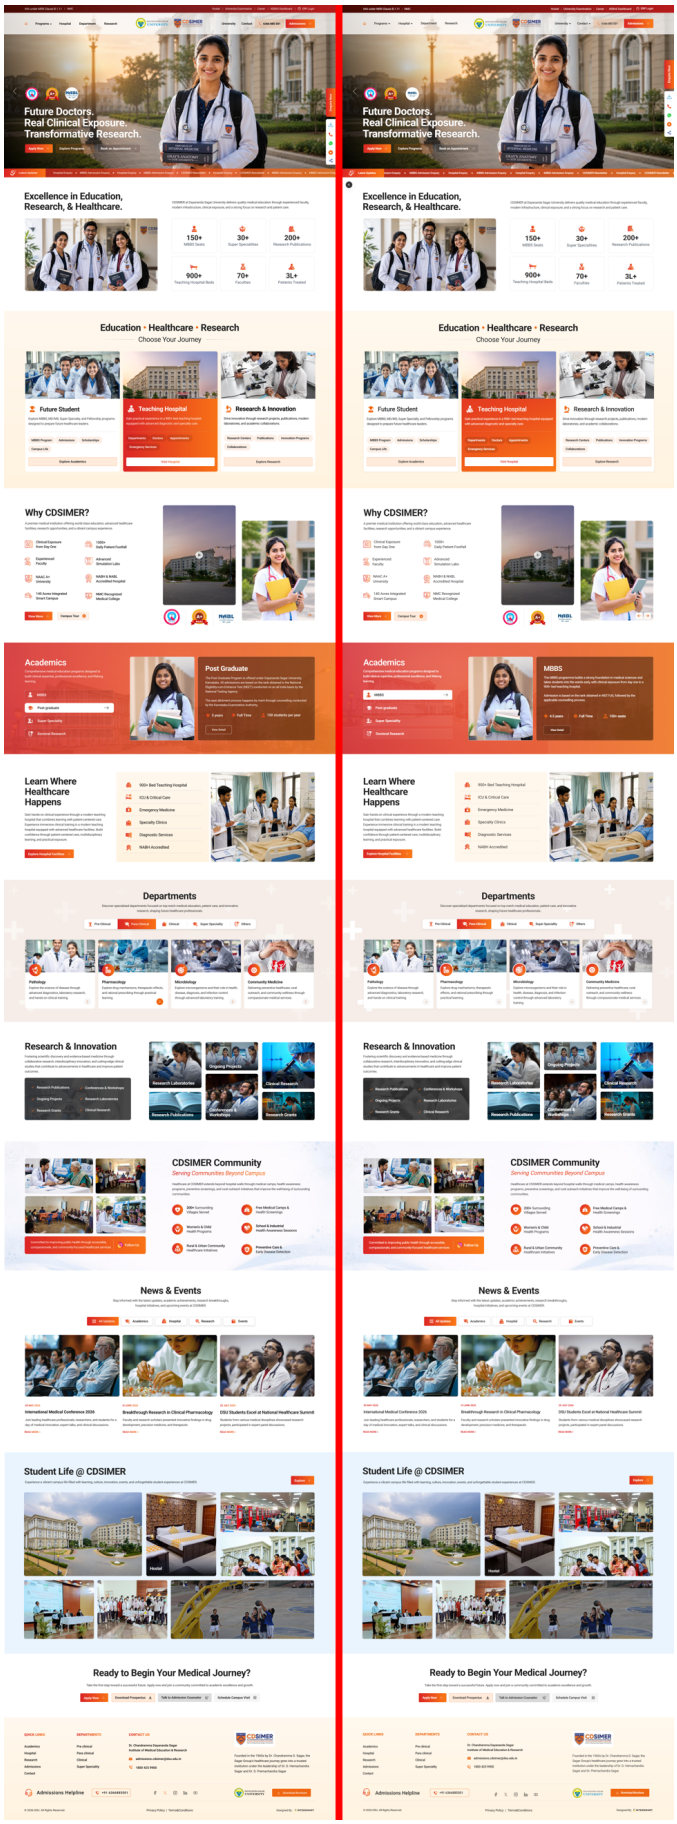

Reference: *D:/downloads/Ddu medical.pdf* (1920 x 10521). Live: http://localhost:3000 rendered in headless Chromium at 1920px, full page (10521px tall, identical height). Date: 2026-10-19.

Method. Both pages rasterised 1:1 and compared pixel by pixel (channel delta > 40). Lazy images were forced to load by slow scroll before capture. Hero compared on slide 1. Block offsets measured by cross-correlation. Each finding has evidence in the order **top = design, middle = live, bottom = diff mask** (white/colour = changed).

Result. Layout, section order, content and imagery match the design; page height is identical. 13 items: 3 High, 7 Medium, 2 Low, 1 Info (not a defect). Raw changed-pixel ratio is 9.9% of the page, almost all from text anti-aliasing, 1px offsets and the items below.

ID	Section	Severity	Deviation
D1	Header / nav	High	Chevron icons on nav items that have none in the design
D2	Header / nav	Medium	Nav typography and spacing
D3	Why CDSIMER	Medium	Image slider arrows styled differently
D4	Academics	High	Default active tab/content differs; meta dividers added
D5	Research & Innovation	Medium	Tile label and list row spacing
D6	Student Life	Medium	"Hostel" label offset; photo crops differ
D7	Footer	High	Helpline row: label size, social icons position and colour
D8	Ready to Begin CTA	Medium	Heading offset, button gap and label weight
D9	Community	Low	Follow Us button content
D10	Choose Your Journey	Medium	Card text wrapping and chip styling
D11	Departments	Medium	Card description wrapping and arrow state
D12	Global	Low	1px vertical / sub-pixel offsets
D13	Hero	Info	Autoplay slider / ticker (not a defect)

Overview: design (left) vs live (right)

D1 [High] Header / nav: Chevron icons on nav items that have none in the design

Design: Hospital, University and Contact are plain text links; only Programs has a chevron.

Live: Hospital, University and Contact render with a dropdown chevron.

D2 [Medium] Header / nav: Nav typography and spacing

Design: Nav labels heavier and more widely spaced. Phone number "6366 885 501" is bold.

Live: Labels lighter and tighter. Phone number regular weight. Top bar text slightly narrower, ERP Login icon/text ~2px higher, top bar gradient darker on the left.

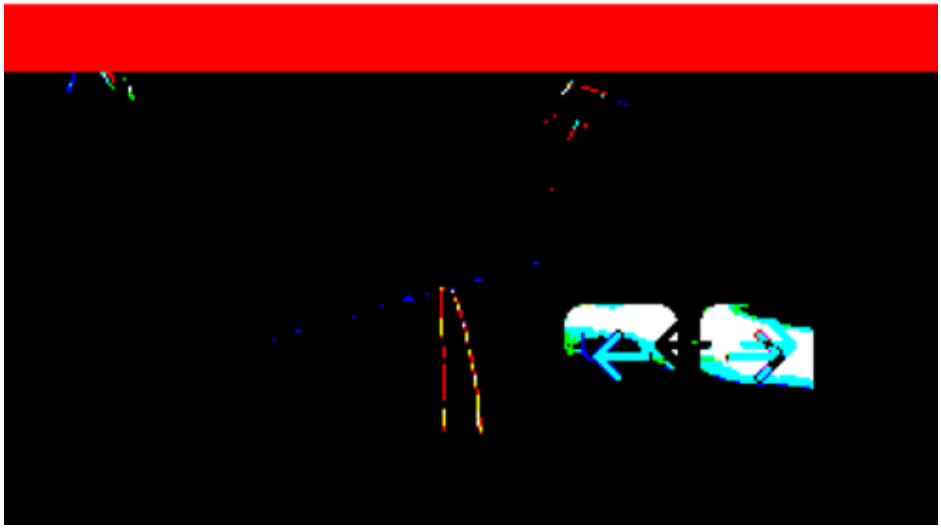

D3 [Medium] Why CDSIMER: Image slider arrows styled differently

Design: Bare arrows with no box: left grey, right orange.

Live: Both arrows inside white rounded square buttons, both orange.

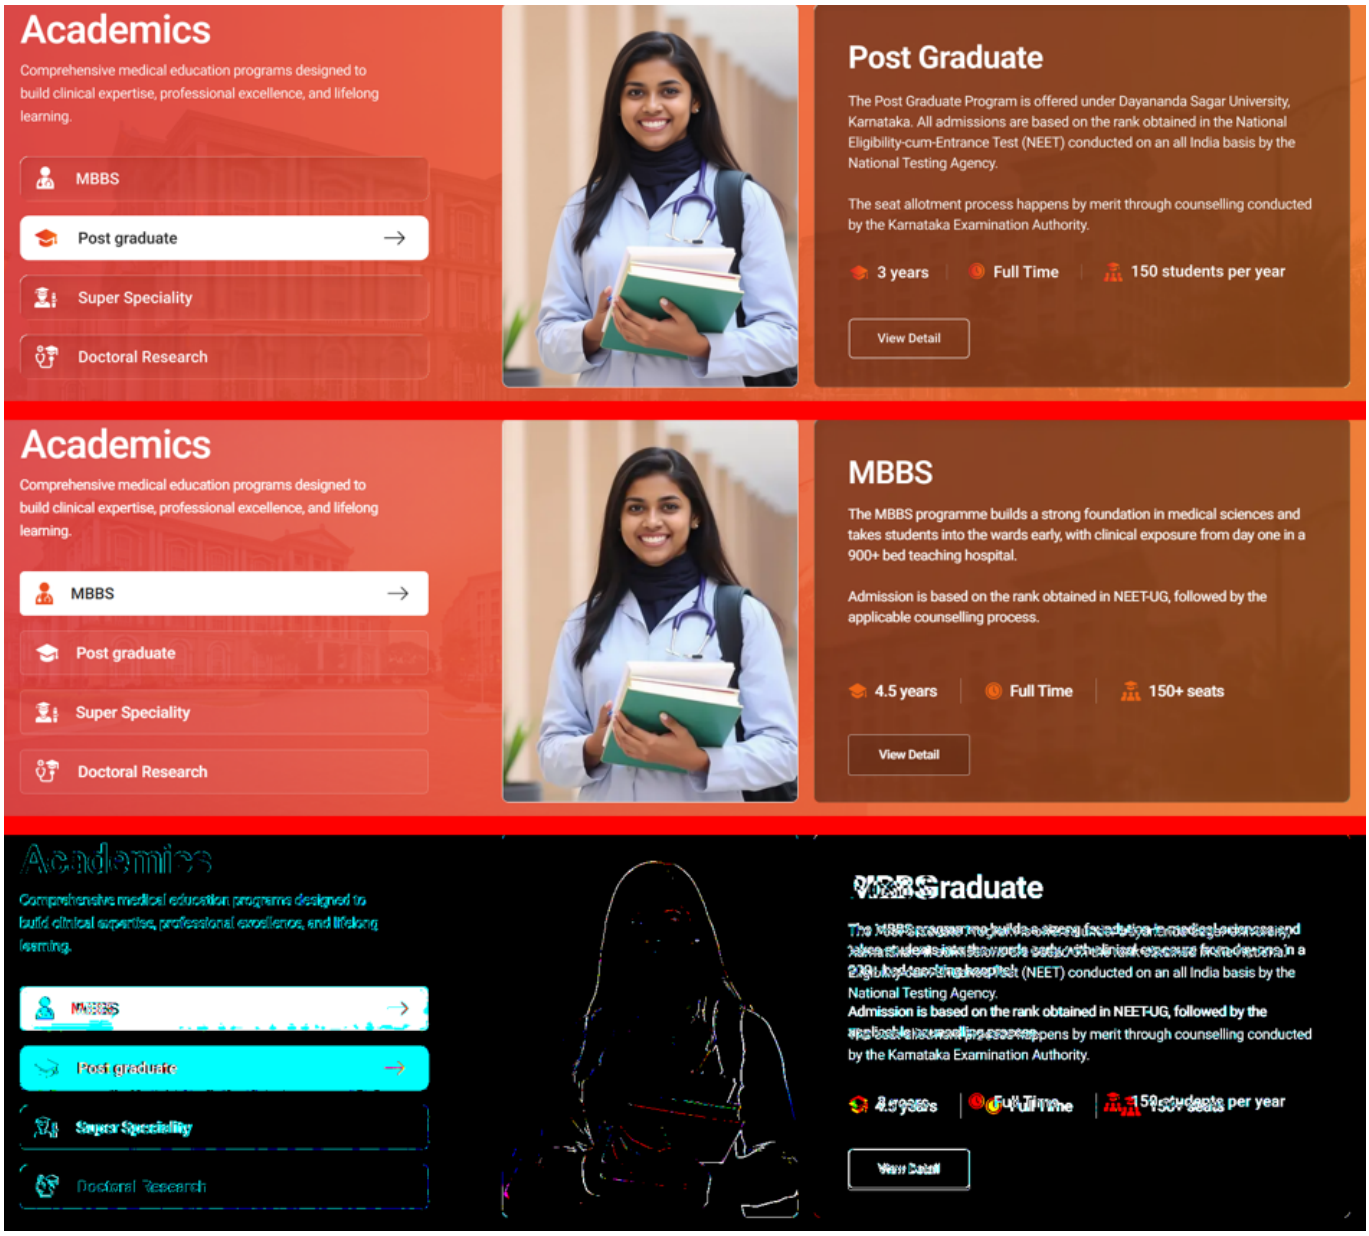

D4 [High] Academics: Default active tab/content differs; meta dividers added

Design: "Post graduate" active: 3 years / Full Time / 150 students per year, no dividers.

Live: "MBBS" active: 4.5 years / Full Time / 150+ seats, with vertical dividers between meta items. Body block ~3px lower.

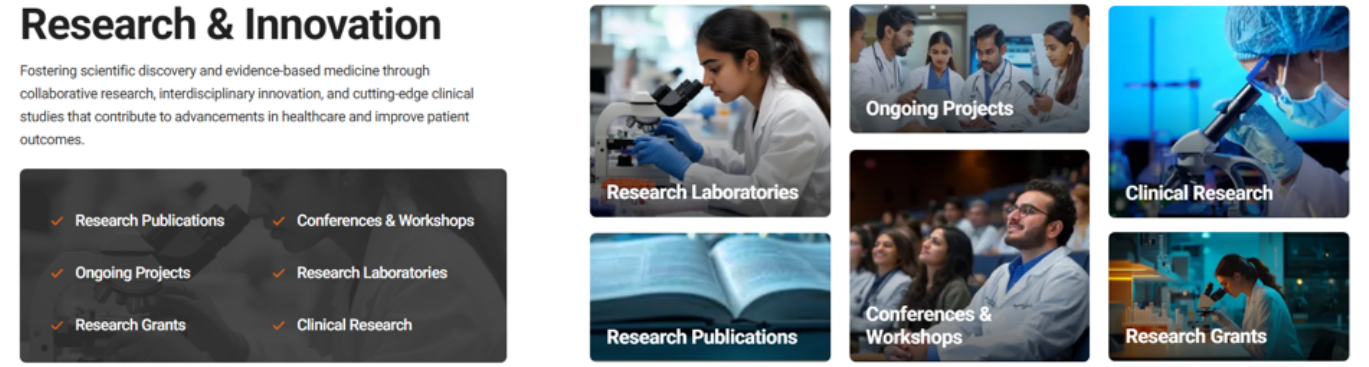

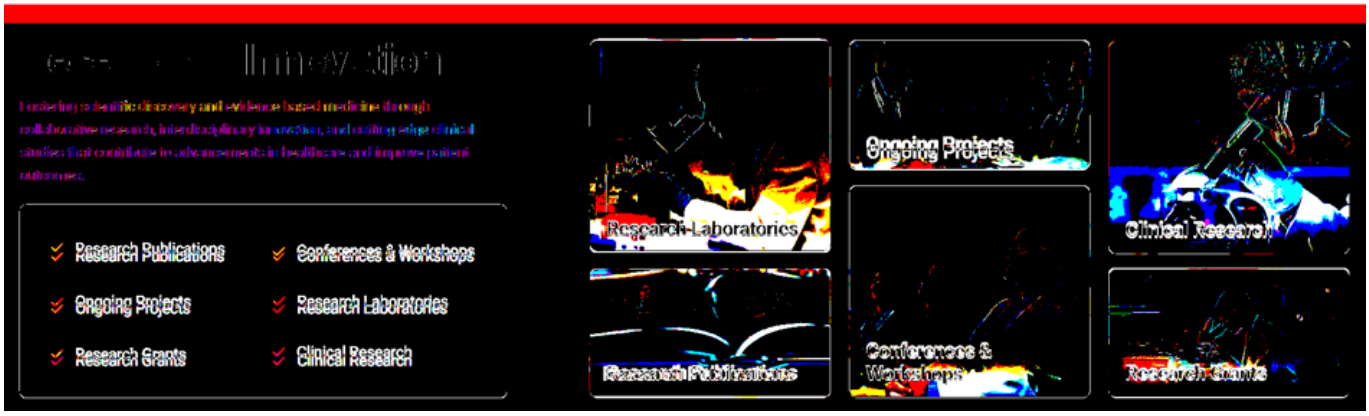

D5 [Medium] Research & Innovation: Tile label and list row spacing

Design: "Ongoing Projects" label sits ~9px lower in its tile. List rows ~9px closer to the top; list panel background darker.

Live: "Ongoing Projects" label ~9px higher. List rows ~9px lower; panel background lighter, photo behind more visible.

D6 [Medium] Student Life: "Hostel" label offset; photo crops differ

Design: Label sits ~17px higher above the tile bottom. Photos framed with a different crop (edge diffs on all tiles).

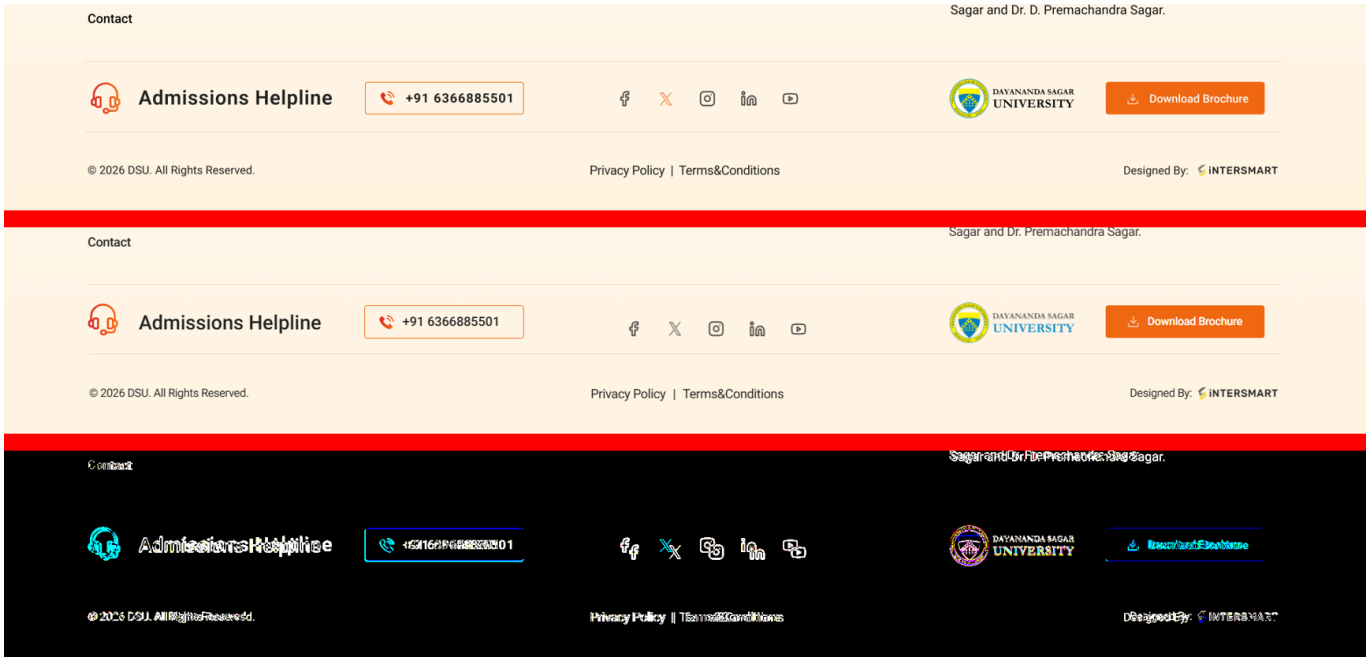

Live: Label ~17px lower (tighter bottom padding). Photo crop/scale shifted vs design.

D7 [High] Footer: Helpline row: label size, social icons position and colour

Design: "Admissions Helpline" larger/bolder. Social icons ~11px left and ~10px higher; X icon is orange. "Designed By" ~8px left.

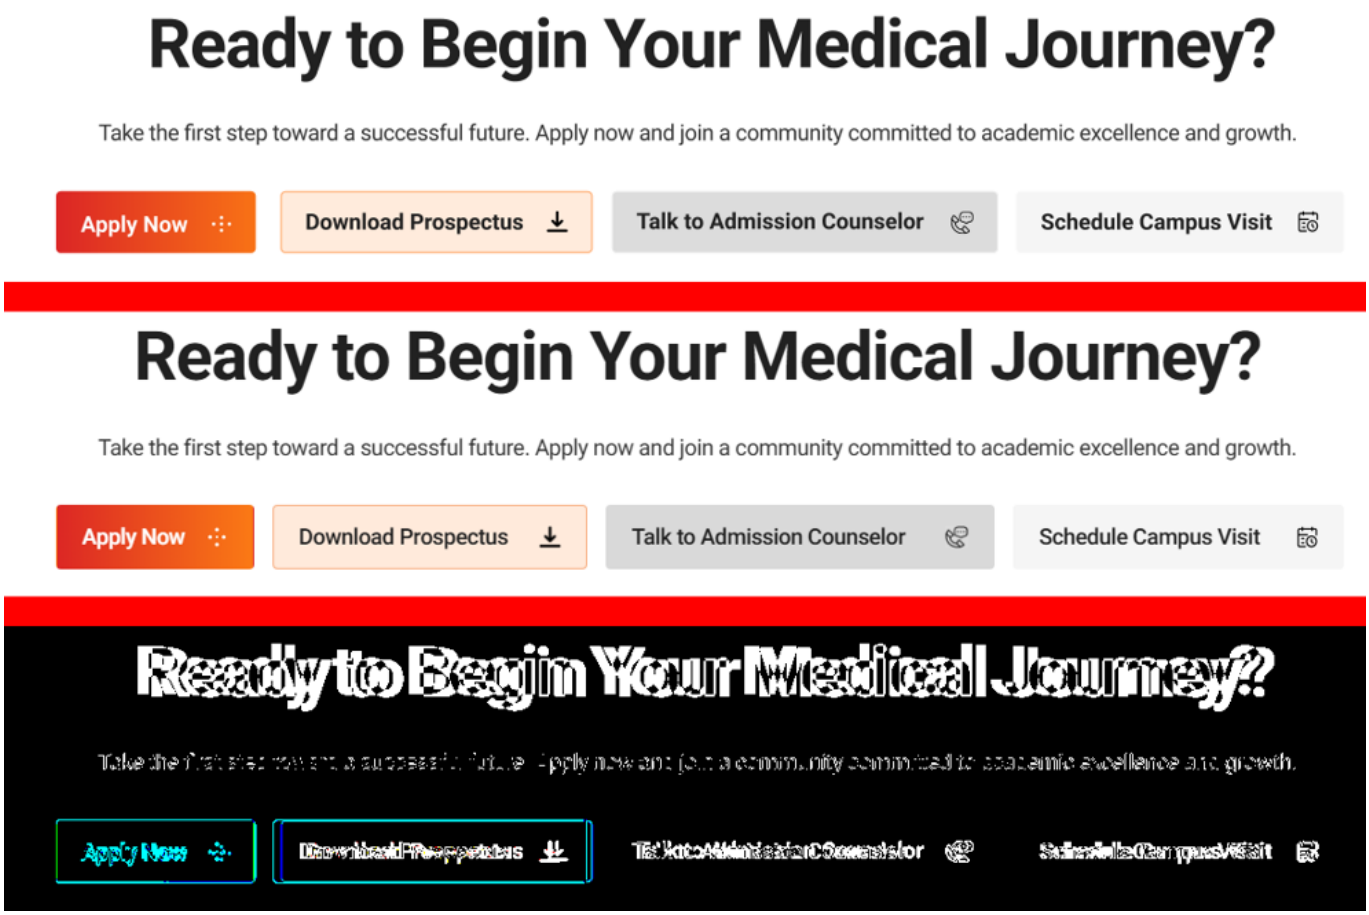

Live: Label smaller. Social icons shifted right and lower, all grey (X not orange). "Designed By" ~8px right.

D8 [Medium] Ready to Begin CTA: Heading offset, button gap and label weight

Design: Heading ~10px further right. Gap between buttons 20px. Button labels semi-bold.

Live: Heading ~10px left. Gap 14px (buttons start 6px early). Labels medium weight.

D9 [Low] Community: Follow Us button content

Design: Instagram icon ~30px; text and divider ~4px left.

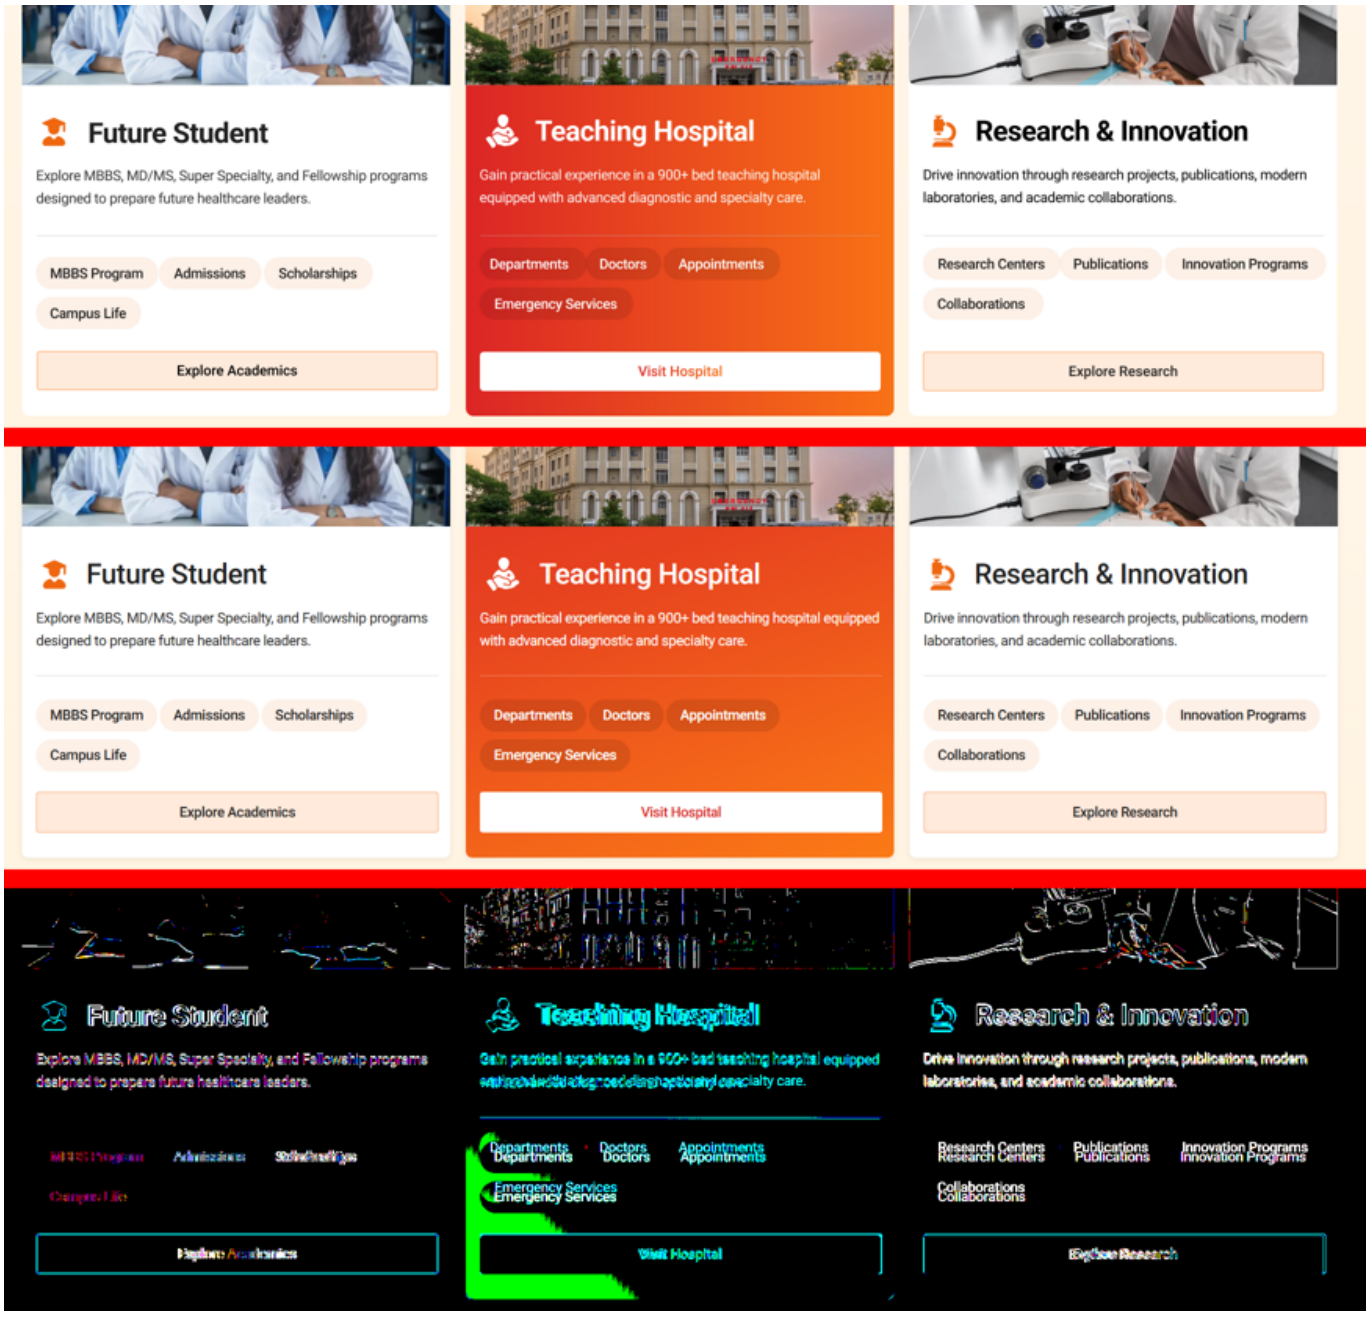

Live: Icon ~28px; content ~4px right. Collage photo crops differ slightly.

D10 [Medium] Choose Your Journey: Card text wrapping and chip styling

Design: Teaching Hospital body wraps "...teaching hospital / equipped with..."; titles ~2px smaller; chip text heavier.

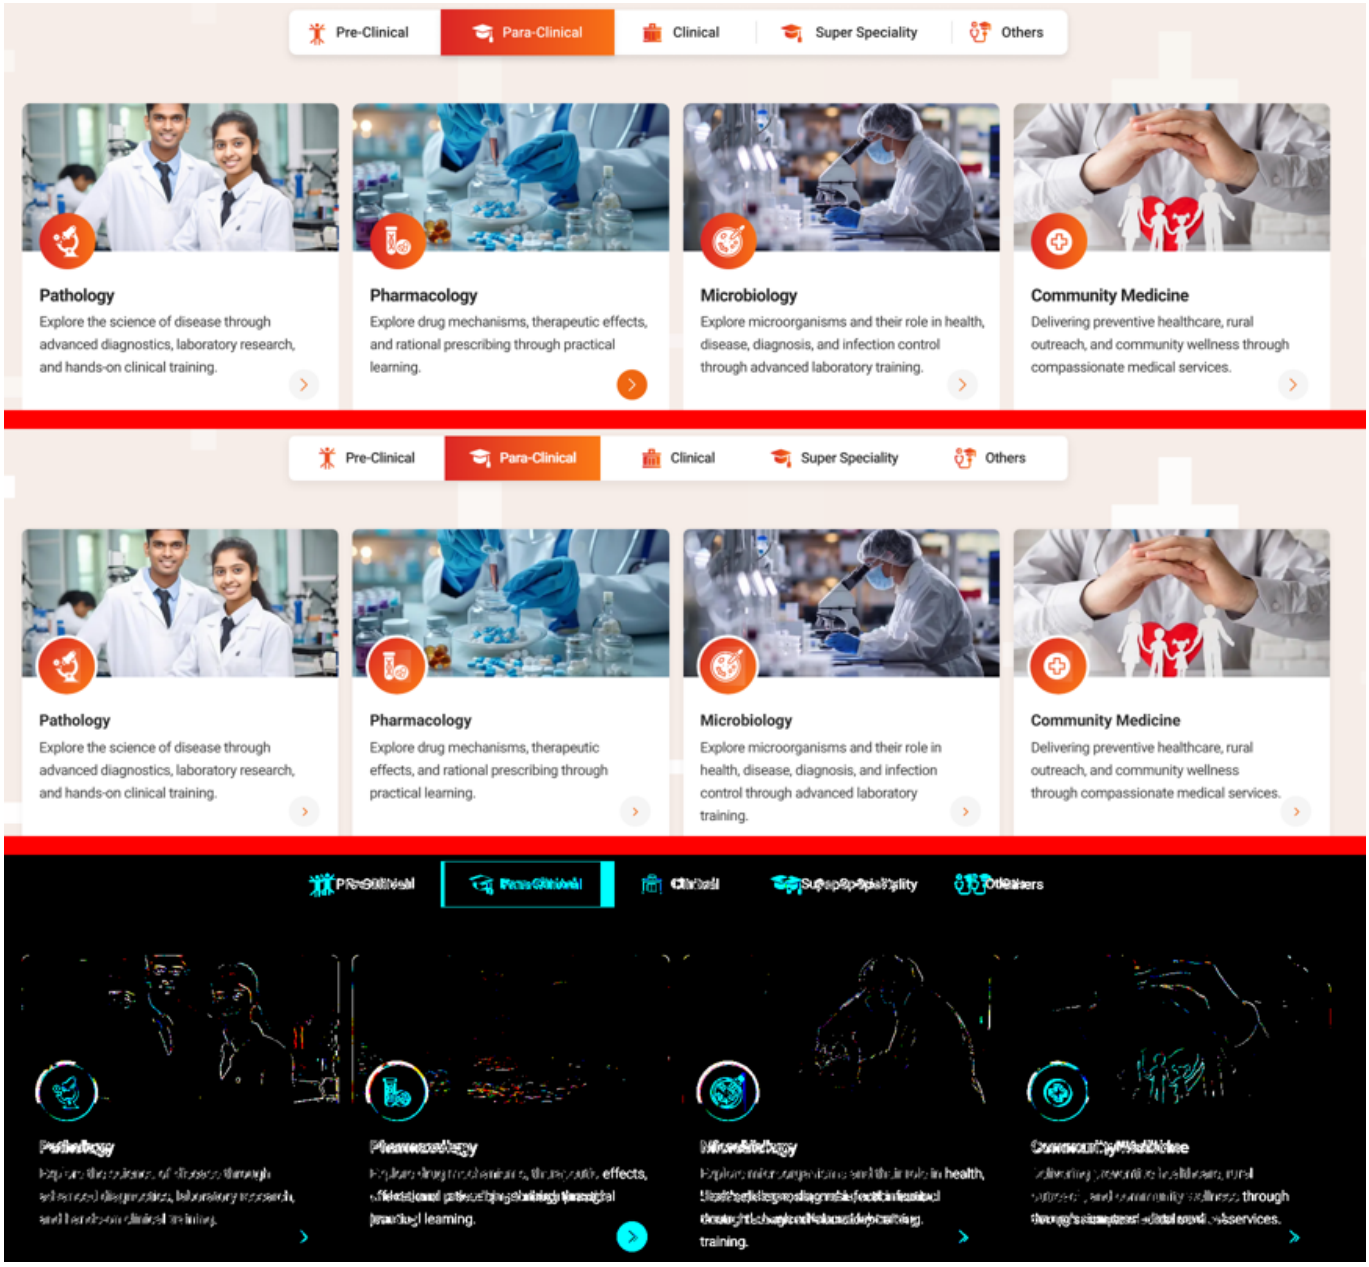

Live: Wraps "...teaching hospital equipped / with..."; titles larger; chip text lighter; Teaching Hospital chips darker.

D11 [Medium] Departments: Card description wrapping and arrow state

Design: Pharmacology/Microbiology descriptions wrap to 3 lines. Pharmacology arrow is filled orange (active/hover state).

Live: Descriptions wrap earlier (Microbiology 4 lines). All arrows default outline. Tab icons 1-2px offset.

D12 [Low] Global: 1px vertical / sub-pixel offsets

Design: Block cross-correlation: stats grid, journey cards, Why header +1px; Student Life heading -2px; CTA heading 10px in x.

Live: All text blocks are 1px off the design; anti-aliasing and font weight make text fail a strict pixel diff everywhere.

D13 [Info] Hero: Autoplay slider / ticker (not a defect)

Design: Static slide 1.

Live: Slide 1 matches (4.1% diff, text anti-aliasing only). Slides auto-advance every ~5s and the ticker scrolls, so a naive full-page capture shows other slides.
